HUALAPAI INDIAN NATION | PEACH SPRINGS, ARIZONA | RFP FOR COMMUNITY-SCALE SOLAR FEASIBILITY STUDY

Pre-Submittal Questions and Answers on Request for Proposal for Consultants issued on February 23, 2017

March 7, 2017

ADDENDUM NO. 2

Response to General Questions

- 1. For item 3a, is the tribe requesting a detailed system design based on the system capacity determined in Item 1a, including bill of materials, etc., or will a reputably cited source offering a credible dollar per watt value be sufficient? Those consultants with the most detailed and credible information will score the highest points in this category.
- 2. For item 3d iv, should this sub-task only include estimating needed cash and at what point in time it would be needed? That is appropriate; however, the consultant can also recommend a method to acquire funds that takes into account annual grant cycles.
- 3. For item 3d viii, please clarify the life-cycle costing per 10 CFR 436. The life cycle cost methodology (§ 436.12) for this part "is a systematic analysis of relevant costs, excluding sunk costs, over a study period, relating initial costs to future costs by the technique of discounting future costs to present values."

Response To Questions

Should you have any questions regarding this Addendum, please contact me at (928) 753-0872.

Except as modified herein all other specifications, terms, conditions and special provisions shall remain the same.
